

Diabetes Care Coordinator Program: Facilitating Diabetes Care in Primary Care Offices

Do you want to:

- Improve care for your patients with diabetes?
- Implement recommended care guidelines?
- Establish systems to track tests and exams and monitor results?
- Promote patient self-management?
- Utilize staff more efficiently?
- Develop a cohesive diabetes care team?

The California Diabetes Program can help!

Our Diabetes Care Coordinator Program trains medical assistants to become part of the diabetes care team and provides tools and technical assistance to enhance diabetes care in your medical office.

Technical Assistance

- Examining current diabetes care practices
- Integrating the Diabetes Care Coordinator Program into your medical office
- Performance monitoring

Training for Medical Assistants

- Basics of diabetes
- Using a diabetes flow sheet to track tests and exams and facilitate care
- Filling out a Diabetes Health Record Card for a patient
- Connecting patients with community resources

Tools

- Basic Guidelines for Diabetes Care
- Diabetes Flow Sheet
- Diabetes Health Record Card for patients, in multiple languages
